

Glosur

Glow the Skin naturally with **Glosur**

## Common causes of Skin damage

Exposure to UV light breaks down the **skin's** connective tissue — collagen and elastin fibers, which lie in the deeper layer of **skin** (dermis). **Skin** then begins to sag and wrinkle prematurely

# Choose Glosur

**Advanced formula for Aging skin** with active Ingredients like

**Matrixyl:** Matrixyl (Palmitoyl Pentapeptide) stimulates the growth of new collagen, elastin, and hyaluronic acid which aids in refilling wrinkles naturally from within the skin.

**Fitoderm** (Squalene) : Effective emolient and anti-oxidant. With its anti-inflammatory activity fights acne and eczema and improves skin condition.

**Hyaluronic acid:** Hyaluronic acid keeps collagen synthesis up, as well as retains skin moisture, which contributes with anti-aging benefits to the skin.

**Arbutin:** Arbutin, a natural skin lightening/whitening agent. It works by slowly releasing hydroquinone through hydrolysis, which in turn blocks Tyrosinase activity and reduces the skin's melanin (pigmentation) production.

**Panthenol:** panthenol promotes wound healing, helps restore damaged epithelium, reduces itching and inflammation, improves skin hydration, reduces transepidermal water loss, improves skin roughness. It improves skin texture and elasticity, making Panthenol ideal for treating dry, scaly or coarse skin.

- Reduces wrinkles in aging
- Removes acne
- Protects from Pollution
- Gives natural glow to the skin
- Smoothens, Moisturizes and gives even tone to skin.
- Whitens the skin
